Tablet Kiosk System

lilitab Tablet Kiosk System

Tablet Friendly. lilitab is able to support most 10″ tablets on the market, including all 10″ Apple iPads, the Microsoft Surface RT, Samsung Galaxy Tab, Google Nexus 10 and more. And no matter what new tablets are introduced into the market, lilitab is ready and equipped for change and upgrade.

MagDock. The patented MagDock feature is mounted at the top of the pole where the lilitab head unit is mounted. With a turn of a key, the lilitab head unit easily detaches for assisted selling, maintenance or access to the tablet. The pass through power automatically begins to charge the tablet when docked. The lock offers 100 different key codes. lilitab units can be keyed alike or randomly assigned. Lilitab head unit can be mounted landscape or portrait.
Experience zero downtime. In public environments, stuff happens. Who wants to call and wait for a technician when it does? If your tablet stops working, just turn the key to swap in a new lilitab head unit. Problem solved—no waiting, no technician necessary.

MagKey. The patented MagKey is a feature that allows you to securely sleep your lilitab when an iPad is installed. Insert the key to put the iPad asleep, remove to wake and return your kiosk to the exact state it was in. This allows you to turn your kiosk ″on″ and ″off″ without accessing or removing your iPad—a key concern for establishments who power down their fixtures at night.

Pro Line vs. Basic. Not all businesses are created equal so we created two product options. For maximun versatility, the Pro Line includes the MagDock for easy lilitab head unit release. The lilitab head unit can also be tilted up and down +/- 22.5° (can be fixed in place at any angle too). The Basic package has a fixed neck, no MagDock and a lower price point.

Mega expandable. With added expansion ports on the back of the lilitab head, you can easily add third party electronics, as well as various customizations such as exposing the rear facing camera on any tablet.

Multiple mount options. lilitab kiosks provide a variety of mount options, including bolt-down or optional base for the floor, surface or counter units and a wall mount. No matter your size of space, you'll find a lilitab that fits your needs.

lilitab iPad® Kiosk System

Optional secure card reader. Need a magnetic stripe reader? Simply add a card reader. You can choose Lilitab's own iPad 30pin encrypting & tokenizing reader or a Square™ reader or similar reader.

Radio transparent. Since there's no metal in the lilitab head unit it won't interfere with your tablet's various signals (WiFi, 4G, and Bluetooth) ensuring that you get maximum range and data throughput.

It likes to dress up. Brand your lilitab your way with many options including custom silk-screened faceplate design, backdrop graphic (for Floor and Counter only), vinyl banner, brochure pocket, keyboard, ID scanner, and more.

Face options. lilitab's secure enclosure comes with your choice of a faceplate to suit your security & camera needs. There's six faceplates to choose from and we've covered all the bases, including multiple combinations of exposed and hidden controls for the home button and/or camera.
